Sustainability vis-à-vis Livelihood: The Peren story

*Imtinaro Longkumer**
*Sentuile***

Abstract

The United Nations in its 2030 Agenda for Sustainable Development Goals endeavors to "achieve gender equality and empower all women and girls". While the idea of sustain ability and livelihood strives in producing goods and services by causing little or no damage to the environment, it is crucial to create opportunities and space for women for sustainable development. Women play key roles and have pervasive effect on the well being of their families, communities and local eco-systems. The UNDP report -Nagaland chapter (2009), also underlines that women's participation in management of natural resources is not only an issue of equity but is a more efficient and time tested way of preserving the biodiversity. The study intents to examine the sustainable livelihood scenario of Peren district in Nagaland1 with special emphasize on women's role. The study is delimited to women in Peren district who are engaged in entrepreneurial activities for their means of livelihood. The paper is descriptive in nature and uses both primary and secondary sources to represent the data. For collection of primary data, unstructured interview method was used as tool for study. A total of 17 representative samples were used to measure and administer the tool. Relevant books/journals, government survey records, published and unpublished articles were used as base for secondary information. Analysis and interpretation is done using qualitative narration technique.

Keywords : Sustainable livelihood, Women, Entrepreneurship, Home garden, SHG, Education.
