(5th Semester)

EDUCATION

(Honours)

Paper No. : EDN-502

(Statistics in Education)

Full Marks : 70

Pass Marks : 45%

Time : 3 hours

*The figures in the margin indicate full marks
for the questions*

1. Explain the meaning, nature and scope of educational statistics. 4+4+6=14

Or

Enumerate the sources of educational data and the use of educational statistics. 7+7=14

2. What are the different measures of central tendency? Discuss them with their merits and demerits. 6+8=14

Or

Calculate the standard deviation (SD) from the following data : 14

<u>Class Interval</u>	<u>Frequency</u>
5-9	7
10-14	12
15-19	17
20-24	22
25-29	27
30-34	32
35-39	37
40-44	42
45-49	47

3. What is rank difference method of computing coefficient of correlation? Discuss the process of its computation with the help of some hypothetical data. 4+10=14

Or

Explain the concept and kinds of correlation. 14

4. What do you mean by normal probability curve? What are the characteristics of that curve? 4+10=14

Or

What do you understand by the term 'normal probability'? What do you mean by divergence from normality? Define and explain skewness with a diagram. 3+3+8=14

5. What is a variable? Explain the types of variables. 4+10=14

Or

Plot a Histogram and a Frequency Polygon from the given data : 7+7=14

<u>Class Interval</u>	<u>Frequency</u>
65-69	1
60-64	3
55-59	4
50-54	7
45-49	9
40-44	11
35-39	8
25-29	2
20-24	1
